Disinfection of Single Use Stethoscopes

April 13, 2020

Sterilization and Conservation of Single Use Stethoscopes

Stethoscopes can be wiped down with an EPA approved disinfectant wipe. Colleagues must test the device for integrity and functionality prior to re-use.

- Single use stethoscopes should **not** be disinfected using **any** type of sterilization process or submerged in any liquid.
- A 70% alcohol wipe is recommended but not readily available. May substitute alcohol prep pads.
