Date: September 7, 2018

Effective: September 12, 2018

Test Name: Hepatitis B Surface Antibody will have a new name of Hepatitis B Surface Antibody Qual and Quant (HBSAB).
Performing Laboratory: MCL
CPT: 86706
Specimen Requirements: Gold/Green
Minimum Volume: 1 mL of serum/plasma

Stability:
- Room Temperature: 3 days
- Refrigerated: 7 days
- Freeze: ≥ 7 days

Rejection Criteria: Specimens that are:
- heat-inactivated
- pooled
- grossly hemolyzed or
- obvious microbial contamination.

Test Methodology: Abbott Architect i1000sr chemiluminescent microparticle immunoassay
Normal Range: Nonreactive
Reportable Range: Nonreactive; Equivocal; Reactive
Client List Price: $115.00
Patient/Insurance Price: $60.00

Please contact Mona Dinnauer, Outreach Manager, at 515-643-4933 with any questions.

Thank you for choosing Mercy Clinical Laboratory.
