MercyOne Des Moines Medical Center named one of the nation’s 50 Top Cardiovascular Hospitals

MercyOne Des Moines Medical Center has been named one of the nation’s 50 Top Cardiovascular Hospitals by IBM Watson Health™. The study spotlights the top-performing cardiovascular hospitals in the U.S. based on a balanced scorecard of publicly available clinical, operational and patient satisfaction metrics and data.

“Excellence in cardiac and vascular care is a legacy of MercyOne Des Moines Medical Center,” said MercyOne Central Iowa President Karl Keeler. “The integrated care provided by our physicians, surgeons and colleagues at MercyOne Iowa Heart Center is second to none. Their ongoing commitment to research and our patients sets them apart, in providing access to the latest treatments and care available.’

The IBM Watson Health Top Hospitals® program uses independent and objective research to analyze hospital and health system performance in key clinical and operational areas for selected cardiovascular procedures and medical care. Indicators include: risk-adjusted inpatient mortality index, risk-adjusted complications index, mean 30-day risk-adjusted mortality rate, mean 30-day risk-adjusted readmission rate, severity-adjusted length of stay, case mix- and wage-adjusted inpatient cost per case, 30-day episode payment, and adjusted operating profit margin.

“To be recognized as one of the top 50 cardiovascular hospitals in the country is quite an honor and something to be very proud of,” said Dr. Mark Tannenbaum, interventional cardiologist and Chief Physician Officer, MercyOne Iowa Heart Center. “This is a testament which reinforces to our patients and their families that when they choose MercyOne Iowa Heart Center for their heart-health needs, they’re getting the best possible care.”

“The integrated care provided by our physicians, surgeons and colleagues at MercyOne Iowa Heart Center is second to none. Their ongoing commitment to research and our patients sets them apart, in providing access to the latest treatments and care available.” – Karl Keeler
