Osteopathic Recognition
Why it matters!
Why it matters

Osteopathic Recognition is a formal acknowledgement that Osteopathic Practice and Philosophy are important in patient care and in resident education. Advanced training in Osteopathic Practice and Philosophy will enhance your ability to care for your patients. Residents that complete MercyOne's Osteopathic Recognition track are able to sit for both Osteopathic and Allopathic family medicine specialty boards.

Rotations

Continuity Clinic — Tuesday half day clinic, reserved clinic time for hands on manipulation training. Staffed in rotation by residents on Osteopathic Recognition track.

Inpatient Manipulation — Regular bedside rounds with the inpatient team applying manipulation to hospital patients.

Dedicated Specialty Rotation — In partnership with Des Moines University, participants in the Osteopathic Recognition track have the option of completing additional electives with the faculty in the Osteopathic Manipulation Clinic.

Didactics

Residents in the Osteopathic Recognition track will attend regular musculoskeletal, integrative, and osteopathic treatment lectures.
