Dr. Dante Dali has devoted significant time with various hospital teams within the organization to bring new thoracic procedures to our patients.

Dr. Dali has been known to sleep on the critical care unit, instead of at home, to assure he is close by for his patients. On one occurrence, his decision to stay at the hospital was lifesaving for the patient who went into cardiac shock during the night.

His nomination letter also mentions how he personally called each of his patients on Christmas Day to wish them a Merry Christmas.

Another patient thank you note read:

Dr. Dali, you saved my father’s life. You have blessed my family and I thank you so much for what you do everyday saving lives and bringing joy to people!

Thank you, Dr. Dali for leading the way in providing Personalized Care.

AWARD CRITERIA:
- Mentors and Educates Others
