Next-Gen Patient Portal Login Tips

I am logging in for the first time....

When you enrolled you were given a letter with a temporary username, password and the answer to a secret question. This was a newly created account and you do not need to register on the site as a new user. Use the username and password you were given in the “Already a Member?” section on the left-hand side of the log-in screen.
It says my password is invalid and I am typing in the password I was given.

Usernames and passwords in the Next-Gen Patient Portal are case sensitive. Make sure that you are only capitalizing the letters that are capitalized in the form you were given when you signed up for the patient portal.

I've created my username and password and am trying to log back in to my portal but it says my username and password are invalid or I can't remember my password now that I have created my own.

The Next-Gen portal provides the opportunity for you to reset your own password. First, click on the link where it says “Need help with your user name and password?”. 
When you click "Need help with your user name and password?". Another screen will load, Complete the information in the sections labeled: If you know your username enter it in the "I have my username " or you can enter your information in "I'm having problems signing in" then click "Next" at the bottom of the screen. If you do not remember your user name, you will need to complete your first and last name, email address, date of birth and zip code. See the area in the green circle on the image below. These will need to be completed exactly as they are in your medical record. When you fill in the date of birth, a calendar will pop up. It is easier if you just type the numbers for the month, day and year of your birth rather than use the calendar. If you do use the calendar, you need to select the year first and then the month and day.
Your security question you created will come up. Enter answer and click on Submit.

Once you click "Submit" an Email will be sent to the you with a reset link.
You MUST open the email and Click "Forgot Password Link"

NextGen Patient Portal Password Reset Notification

To: Patient

This email has been sent to you as part of your request to reset your NextGen Patient Portal User Account password. In order to complete the password reset process, you must click on the link below and follow the on-screen instructions.
