## How We Measure Quality-of-Care

The MercyOne SNF Partners Profile was created to help you select a local provider with a history of success serving patients with conditions similar to yours. This profile includes information about the quality, value, and specialty programs delivered at each facility. We utilized Medicare Care Compare ([www.medicare.gov/care-compare/](http://www.medicare.gov/care-compare/)) and information reported by each partner to understand the capabilities and services.

## Quality Information Highlighted

Although this profile highlights your local options, understanding an agency's performance compared to national practices can be a helpful way of assessing quality.

## Specialty Program

The facility has an enhanced clinical program with physician oversight for these service areas indicating an increased focus and level of service for specific conditions
