

Test Updates & Delays

Test Updates of 07/31/2026

Test Code	Test Name	Performing Lab	Test Link	Date Effective	CPT	Client Price
LAB4726	Streptococcus Pneumoniae Antibodies, IgG, 23 Serotypes	Mayo	Streptococcus Pneumoniae Antibodies, IgG, 23 Serotypes	7/23/2026	NA	NA

Comments: Due to reagent issues, PP3 (serotype 3) is not being reported. Another update will be provided once PP3 testing resumes. Note: An adequate response to pneumococcal vaccination is generally thought to be demonstrated when a patient shows response to at least 50% of the serotypes in the PN23 assay. For most patients, this can be assessed even if only 22 serotypes are reported.

LAB830	Lead, Capillary Blood	Mayo	Lead, Capillary Blood	7/21/2026	83655	\$22.00
--------	-----------------------	------	---------------------------------------	-----------	-------	---------

Comments: Orderable will now route to Mayo for testing. A reminder to provide adequate and accurate demographic information for testing documentation.
