Test Updates & Delays

Test Delays of 11/13/2026					
Test Code	**Test Name**	**Performing Lab**	**Test Link**	**Date Effective**	**Target Resolution Date**
LAB180	Angiotensin Converting Enzyme, CSF	Mayo	Angiotensin Converting Enzyme, CSF	10/5/2026	TBD
Comments: Effective Immediately, results for Angiotensin Converting Enzyme, CSF are delayed due to reagent backorder. Specimens will be held, stabilized, and will be tested as soon as testing has resumed.					
LAB7969	Toxocara Antibody, IgG	Mayo	Toxocara Antibody, IgG	9/25/2026	TBD
Comments: Due to kits on backorder, Toxocara Antibody IgG is down effective immediately with no recommended alternative test.					
LAB1202	Hypersensitivity Pneumonitis Profile	Mayo	Hypersensitivity Pneumonitis Profile	7/22/2026	5/22/2027
Comments: Due to reagent issues, Aureobasidium pullulans, IgG Antibody, will not be reported. The CPT code will be updated to 86001 X 7 to reflect this change. The absence of anti-Aureobasidium pullulans IgG does not limit the clinical relevance of the HP antibody panel in the evaluation of at-risk patients. This change is expected to last approximately 6-10 months. Another update will be provided when full testing resumes.					
LAB564	Stone Analysis	Mayo	Stone Analysis	8/5/2026	TBD
Comments: Due to equipment issues, turnaround time may be temporarily extended up to 12 days. To help optimize TAT, please ensure kidney stones are thoroughly dried and cleaned prior to shipping.
